The workplace and the way we work are constantly evolving. We are continually required to create new spaces within existing environments with an increasing demand on **flexibility**. To meet this demand Nautilus was conceived. Originally taken from a client brief which required a free standing, acoustic, fabric covered furniture solution.

The hand crafted nature of the manufacturing allows any shape or size to be created, leaving no limitation to the product, only your imagination. This **flexibility** is embedded within the product in all forms including height, width, depth, footprint, shape, layers, fabrics, accessories and uses, all of which can be tailored to your exact requirements.

Nautilus panels are 55mm thick and acoustically tested with a 30dB noise reduction rating, ensuring that privacy is maintained where specified. Nautilus panel height options follow recommendations set out in BSEN1023 part 1 and Nautilus is tested and certified to BSEN1023 parts 2 and 3. Nautilus is quick and easy to install, virtually tool-free with most models being suitable for a one person build in less than 1 hour. This **flexibility** gives the user fast relocation within a product that does not require building regulations to be sanctioned.

The **flexibility** within Nautilus allows inviting areas to be created which can be designed to work in conjunction with existing office furniture, resulting in employees having access to their optimal environment for working. With this in mind we have categorised Nautilus into 3 product solution types, **SOLO**, **TEAM** and **WALL**. To stimulate your imagination we have produced 90 standard options within these solution types. These options are a starting point, as **flexibility** is paramount, please specify them as they are or show us what you would like to see instead.

Warranty – Nautilus provides a 5 year guarantee against defects providing that the product has only been subjected to normal wear and tear and has not been misused or abused. Fabrics are excluded, please see manufacturer for their guarantee.

Flexibility - Nautilus can be manufactured to any shape or size allowing you full adaptability. The options shown here are examples of what can be created.

Modular - Nautilus can be manufactured as Nautilus Modular which provides the same type of solution but manufactured from 5 standardised pieces which allows you re-configurability for future use. Please note with this solution the sizes shown will change.

Acoustic - Nautilus panels are acoustically tested and rated at 30dB noise reduction. The panels achieve this with an internal layer of sound absorbing foam. Certificate No. 22913 T01.

Lighting - Nautilus panels and lids can be fitted with a range of lighting solutions to enhance working areas. All cabling is hidden within the product and terminates at floor level.

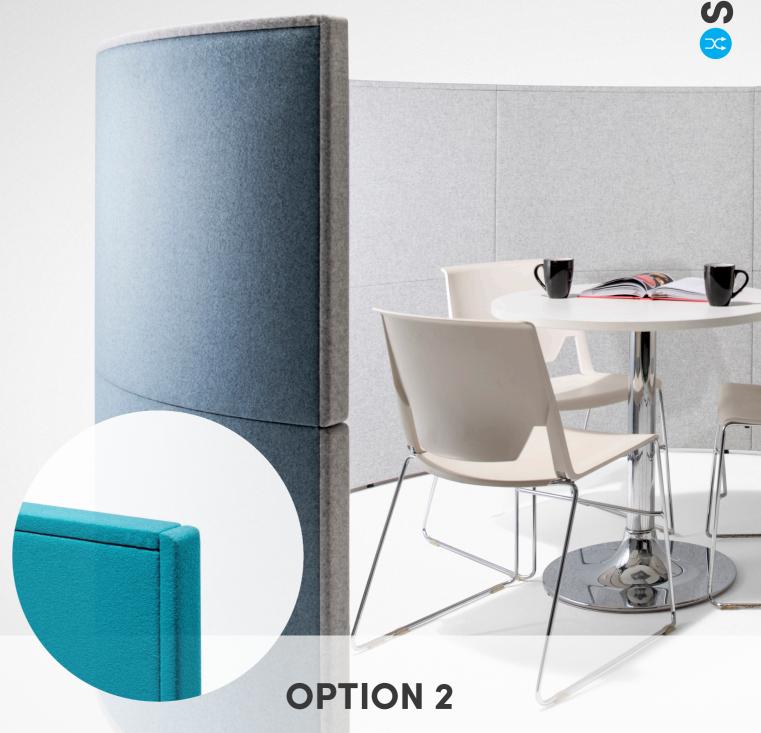

Power - Nautilus panels can be fitted with a range of power and charge solutions to enhance working areas. All cabling is hidden within the product and terminates at floor level.

4

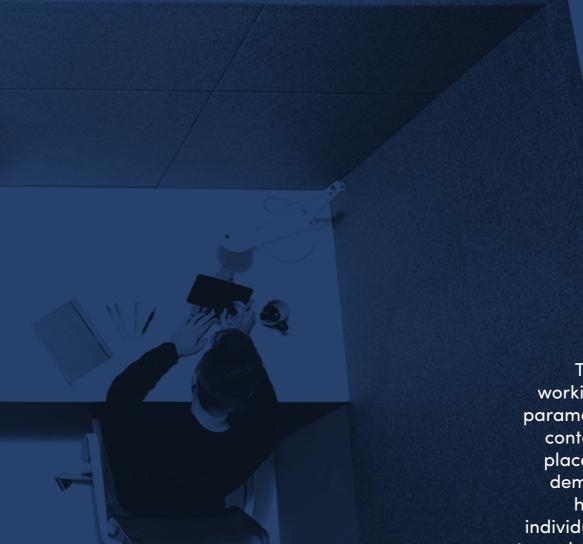

Nautilus panels can be manufactured in two style options. Option 1 has the same fabric on each panel face. Option 2 has different fabrics on each panel face. Option 1 results in the end of each panel having a wrap around effect with an inset top cap. Option 2 results in the end and top of each panel having an exposed cap.

 6

SOLO

The majority of workspace is still dedicated to independent working. Providing privacy and a space to work for their staff is paramount for most employers. Improving individual spaces with contemporary design, including warmth, colour and a calming place to focus is becoming more important. Sound reduction is demanded to aid concentration and reduce disruption, in turn helping to improve efficiency and accuracy. Ensuring these individual spaces are flexible in their design, to incorporate short term desking needs (hot desking) is also crucial. Nautilus can fulfil all of these requirements using a variety of solutions.

TEAM

More frequently, individual workspace is being reallocated for use as collaborative space, places to work, meet or socialise with colleagues. To contend with this demand employers are looking for flexible furniture solutions that provide modern aesthetics with integrated communication and media connectivity which encourage group collaboration. Spaces for team work, briefings and impromptu meetings allow staff to reach their full creative potential, communicate successfully with their co-workers and be inspired by their working environment. By using curved forms to break away from rigid office environments, you provide inviting spaces to share ideas. By creating these rooms-within-rooms, movement is encouraged, and a chance to get away from your usual working desk can lead to improved results. Nautilus can fulfil all of these requirements using a variety of solutions.

WAL

All workspace needs segregation to one degree or another. Providing identity to areas designated to different types of working or departmental boundaries can be important. Likewise, provision for resource isolation, which can be disruptive to staff, must be considered. To contend with this demand employers are looking for flexible furniture solutions that provide modern aesthetics with sound reduction that can shield space for shared resources; printers, storage etc. A well-planned office can create division between working areas in a creative manner, further enhancing the workplace. Nautilus can fulfil all of these requirements using a variety of solutions.

ACCESS-ORIES

Nautilus panels create walls, divide space and provide privacy. Why not add value to the space created using our flexible range of accessories. Seating and table units can be added to collaborative spaces. Desktops can be added to individual working areas. Lids can be added to some models to provide further privacy. A variety of lighting can be added to your specification. Hang over accessories will provide function and why not use Nautilus desk mounted or storage panels to provide consistency.

DESKTOPS & SHELVING

Desktops and shelving are available for most models and can be positioned in an assortment of locations. Sizes are shown where applicable but can be changed to suit your requirements. All desktops are 25mm white MFC. All shelving is 18mm white MFC. All brackets and supports are provided. There are a variety of cable management options for all tops – see below.

SMALL SCALLOP

Scallop size: 50mm x 225mm

Nautilus was originally created from a client brief in 2011. The requirement was for a free standing acoustic phone booth with a fabric upholstered finish. We designed the shape of the foot print with the Nautilus shell shape in mind. The phone booth is still available today.

All Nautilus options are individually unique and made to order. As an alternative, **Nautilus Modular** provides the same type of solution manufactured from 5 standardised pieces which allows you reconfigurability for future use. This solution is only available in style option 2.

All Nautilus models can be manufactured with layer joins at differing heights. Layers can be specified singly or in multiples. There are a variety of options - see above for some examples.
