BALMORAL
CONTRACTS

Quality

Balmoral manufacture in Dunmurry, Belfast, the traditional home of the company since its inception in 1920. Combining over 20,000 square metres of production space with the latest technology in manufacturing, we design and create exceptional furniture solutions. Balmoral manufacture under the stringent ISO BS EN 9001:2015 Quality Assurance standard, enabling us to have confidence in every piece of furniture and seating we supply.

Environment

We have an environmental policy which commits us to reducing waste and energy. We've worked to introduce improvements throughout our manufacturing process and wherever possible reduce the environmental impact of all our operations, enabling us to secure accreditation to the Environmental Management System BS EN ISO 14001:2015.

Accreditations

All products are manufactured under the stringent BS EN ISO 9001:2015 quality assurance standard, the environmental management system BS EN ISO 14001:2015 and the health and safety management system ISO 45001:2018.

Our Mission

Balmoral Furniture is committed to providing complete customer satisfaction through the manufacture and delivery of cost effective, quality office furniture products within agreed delivery time scales.

Customer Care

Balmoral Furniture is committed to continuously improving levels of customer care and has developed a number of services to help make the procurement process as easy as possible for its customers.

Showroom

We welcome visitors to our extensive Showroom, where you can compare and contrast products with the help of one of our experienced Sales Team – Please call to arrange an appointment.

Space Planning and Project Management

Our experienced sales team are readily available to offer free advice and support in space planning, product specification and project management. A free design service is offered whereby the company's design office is equipped with the latest Auto CAD software to create functional and practical layout drawings, bespoke product designs or 3 dimensional project visualisation drawings.

Contents

Focus **100** - Office Desking

The Focus 100 range has established itself as the standard for entry level contract office furniture. The range has been improved to offer more features such as metal handles and provides better value.

Specification

- Focus 100 desk tops and panel ends are manufactured from 25mm MFC (Melamine Faced Chipboard) with 2mm PVC edging
- Modesty panels are manufactured from 18mm MFC
- Steel legs are powder-coated silver (RAL9006)
- Heavy duty metal drawer runners
- Metal-to-metal assembly fittings
- Keyed-to-differ locking systems with hinged keys
- Large 100 x 50 silver cable ports
- Focus 100 is available with a range of desk mounted screens
- Focus 100 is available with a wide choice of Focus storage units
- Customer Bespoke options available

CB Bench - Product Overview

Frame construction
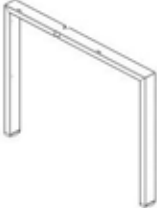

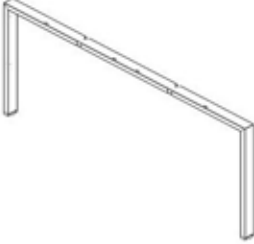

The CB Bench platform has been designed to use the minimum amount of components possible. The system utilises a innovative leg to rail connection to create a stable product whilst providing a cost-effective solution for both desk and bench configurations. The CB Bench platform uses a single cross rail on the desk version, and twin cross rails on the bench version, resulting in a universal top drilling pattern across both options, and the intermediate leg frames will enable the construction of multi-person runs.

MT55 Overview

MT55 BENEFITS

The MT55 meeting table frame system is cleverly designed to use the minimum amount of components to allow the creation of tables of all sizes. Using a leg set containing 4 identical leg components designed to fit into a convenient box, together with a comprehensive rail set selection, MT55 can be used in all sorts of environments and situations. It can also be used as simple 4 legged desk solution if necessary, and is a great solution wherever meeting tables are required. The range includes optional cable management solutions, enabling both vertical and horizontal routing to be catered for. Re-configuration is possible by simply swapping the rail sets for a different size, and replacing the table top panel.

This information pack contains all the information required to specify MT55, including code information and prices to make ordering and specification more straight forward. Desktop drilling information and assembly instructions are also included to assist with installation.

If you have any questions relating to this exciting new addition to the Rack product portfolio, or any other Rack desking products, please call our dedicated sales team.

Thumbnail	Product Code	Description	MOQ	Price

Leg Set (supplied in boxes of 4)
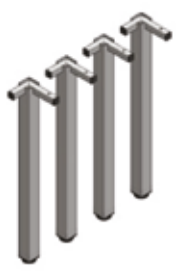

| | MT55-LEG-SET | 50mm Square Leg Set - 715mm High | 10 | 206.00 |

Note: The leg set is supplied as a boxed set of 4. The overall height including a 25mm desktop is 740mm.

Inline Leg Set (supplied boxed in pairs)
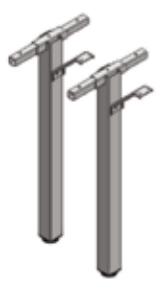

| | MT55-INT-LEG-SET | 50mm Inline Square Leg Set - 715mm High | 10 | 140.00 |

Note: The Inline leg set is supplied as a boxed set of 2. The overall height including a 25mm desktop is 740mm. Includes the Triangulation brackets.

Table Rail Sets (supplied in pairs)

Note: To provide cable management from floor to cable tray

Picnic - Product Overview

Frame construction

The **PICNIC** platform is a robust and sturdy system designed around the spigot method of assembly. The Seat ranges from 1000 to 2000mm in width at 350mm deep. The Table ranges from 1200 to 2200mm in width to 700 or 800mm deep. The Poseur legs unique triangulation design creates lateral stability and allows you to build tables that range from 1200 to 2200mm in width and 700 or 800mm deep. Within the poseur variant you have the additional option of choosing the tube size of the leg frame (40x40mm or 60x40mm). Introducing an intermediate leg to the Table or Poseur range extends the possibilities to build longer configurations where the overall length can be infinite. The Poseur with intermediate leg uses an additional triangulation support to achieve great stability.

SPLINTA SOLO - Product Overview

Table construction

SPLINTA SOLO is an elegant reinterpretation of the humble pillar leg. Consisting of a tapered solid oak leg with height leveller and a cleverly designed top plate, SPLINTA SOLO can be directly screwed or bolted to the underside of any pre-drilled or inserted 25mm table top. **SPLINTA SOLO** offers total flexibility. *Table Tops Not Included*

SPLINTA CONNEKT - Product Overview

Table construction

SPLINTA CONNEKT is a modular meeting/boardroom table system. Consisting of a modified **SPLINTA SOLO** leg assembly and a series of connecting rails to construct a rigid, highly stable table under-frame. The slim profile of the connecting rails increase knee space around the entire perimeter of the tabletop and cleverly designed intermediate legs provide support on long spans and assist when splicing together multiple table tops on very large configurations. * Table Tops Not Included *

SPLINTA ONE - Product Overview

Construction

Perfect for office breakout, reception and lobby areas; **SPLINTA ONE** combines simplicity and elegance in design with the warmth and natural ambience of high finish solid oak.

By cleverly marrying steel connectors to beautiful wooden legs, **SPLINTA ONE** creates a stunning platform to compliment an expansive scope of table top designs.

The **SPLINTA ONE** Table Base Family offers the full versatility of both 3 and 4 legged versions (3 different heights) and even boasts it's very own soft-sleeve fabric cable riser as an optional accessory.

Steel and Solid Oak. Minimum Components. Maximum Flare.

SPLINTA ONE - Extent of Range

Range Details

The **SPLINTA ONE** Table Base Range contains 3 height options for creating quality table bases for any environment. The 3 legged coffee table base is ideal for a top of Ø600, and the 4 legged square coffee table will accommodate a larger top of Ø800mm or 800mm square. The 4 legged rectangular coffee table base will accommodate a 500/600mm width by 1000/1200mm length top. The 3 legged dining height table base is ideal for smaller tops, and will accommodate top sizes from Ø800mm up to Ø1000mm. The four legged dining height table base is available in 2 sizes; the small version will accommodate top sizes from Ø800mm up to Ø1000mm, whereas the large version will accommodate top sizes from Ø1200mm up to Ø1600mm, allowing the creation of collaborative meeting tables. The 4 legged poseur height table base will accommodate a top size of Ø800mm. All options in the **SPLINTA ONE** Table Bases use solid oak timber legs to create a high quality understructure.

Overview

The SPLINTA SIT Family has been designed as a simple collection of seating to complement SPLINTA ONE, CONNEKT & SOLO ranges of timber legged table frames.

The range includes a 4 legged low bench, 3 legged low stool, 4 legged high stool and a 4 legged high bench. All SPLINTA SIT Stools have a luxury seat pad and optional fabric covered button with beautifully finished solid oak legs, connected by cleverly designed steel components to create stunning pieces fit for any environment.

Fabric Pricing Key

Fabric - B	Rivet
Fabric - C	Xtreme
Fabric - D	Main Line Flax, Blazer, Synergy

Extent of Range

The SPLINTA SIT Range consists of 4 seating options for break-out areas and meeting spaces, suitable for any environment.

The Bench and Low Stool have a common seating height of 500mm which is designed to work with SPLINTA ONE dining height tables & the SPLINTA CONNEKT range.

The High Stool and High Bench have a seating height of 830mm which is designed tocomplement the SPLINTA ONE poseur height table & the SPLINTA POSEUR CONNEKT range.

Height Adjustable **Desks**

Active Working
Advice for height adjustable desks

Keep active: Frequently changing your posture and taking opportunities to move away from your desk will help maintain the metabolic activity that breaks down fats and reduces blood glucose levels. Movement will also help you to maintain good postures and reduce muscle fatigue. As the following behaviours become routine, business efficiency should improve, along with the health and wellbeing of you and your colleagues.

Frequent breaks

Spend 2+ minutes in some form of light exercise, even just walking around the office regularly.

While you work

If appropriate, stand in meetings & while on the phone. Rather than emailing, go and see people at their desks.

Hydrate

Drink plenty of water and take regular comfort breaks.
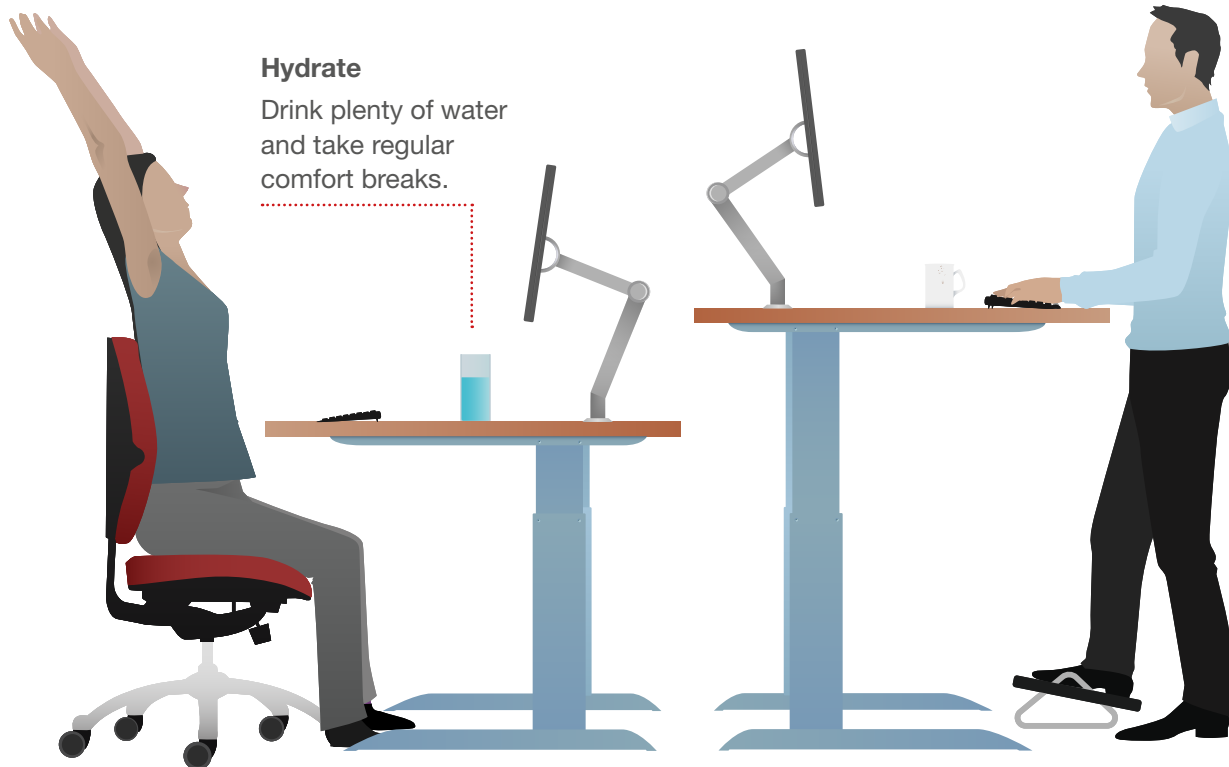

Height adjustable desks

Sit/Stand desks help facilitate movement. They give you the flexibility to choose when, how often and for how long you'll change posture without affecting your work.

Standing

When standing at a desk, wear appropriate shoes. You could also alternate your stance with a footrest.

Suggested schedule

Over the working day, try to spend at least 2 hours standing, aiming to increase this when possible. These durations should be tailored to individual needs & preferences.

| **1 hour** | **20 minutes** | **Repeat** | **Take the Stairs** |
| Seated | Standing | All day | Avoid the lift |

Sit/Stand Electric Height Adjustable Desk with memory switch and upper cable tray

The Sit/Stand height adjustable desk range comes with simple button controls to move between your ideal sitting and standing heights smoothly, quickly and quietly. Electrical height adjustable memory switch to automatically adjust between various height ranges. The strong steel powder coated frame is powered by two synchronised motors hidden within the telescopic legs. Powder coated finished in matt silver RAL 9006 as standard but is also available finished white or black (must be specified at time of order). Illustrated models finished with standard top options.

Product Overview

Frame Construction

The TB BENCH platform utilises the inherent flexibility of a telescopic sheet metal beam to construct a rigid bench understructure. The design intent behind the telescopic beam is to facilitate the construction of a multitude of layouts and configurations utilising the minimum number of stock components possible. TB BENCH is available with a range of leg options (subject to negotiation) and a host of well engineered accessories. TB BENCH can be fitted with sliding top bridges as an option, and the beams support an optional large capacity central drop down cable tray, which when used in combination with the mass cable riser, provides excellent cable management.
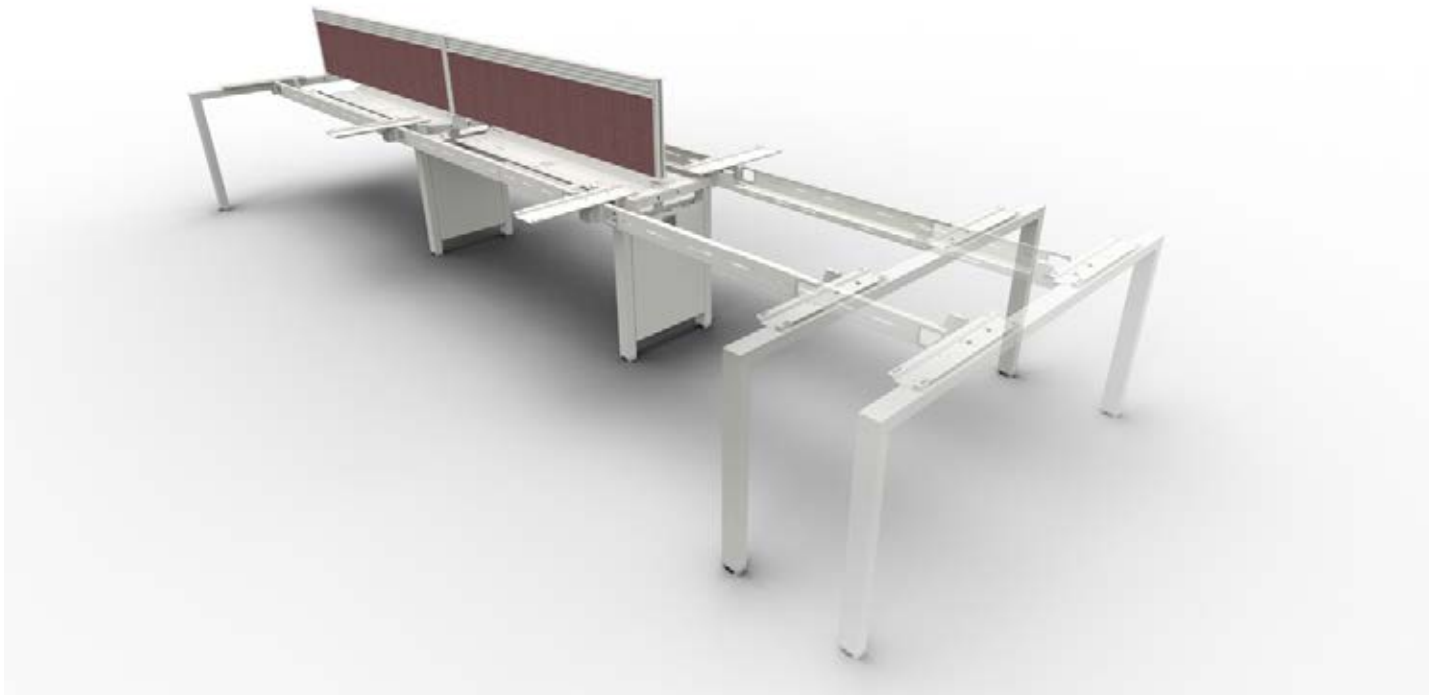

Frame Options and Accessories

The TB BENCH system is a fully resolved system, capable of being assembled in a vast range of configurations, and is available with an extensive range of smart accessories. These include return beam kits, conference end extensions, screen brackets and overhead storage options. Various leg frame sizes can be configured to enable individual or shared returns, and some leg options include a level of height adjustment for added functionality.

TB TIMBER Bench - Product Overview

Frame construction

The **TB TIMBER** platform utilises the inherent flexibility of a telescopic sheet metal beam to construct a rigid bench understructure. **TB TIMBER** introduces an elegant, sophisticated domestic look into any office environment. Using beautifully detailed solid timber uprights on the leg frames, **TB TIMBER** has been developed to provide a viable alternative to 'all steel' desk and bench solutions. **TB TIMBER** uses a hybrid steel/timber leg design and can be specified with a host of well engineered accessories. **TB TIMBER** can be fitted with sliding top bridges as an option, and the beams support an optional large capacity central drop down cable tray, which when used in combination with the mass cable riser, provides excellent cable management.

TB PLANK - Product Overview

The **TB TIMBER** platform is well established in the industry, and provides a robust, well engineered structure that is capable of being assembled in a range of configurations, and is available with an extensive range of smart accessories. These include the **PLANK TOOLBAR** which facilitates the integration of a range of desktop accessories and quirky storage solutions.

TB PLANK is a beautiful addition to the **TB TIMBER** leg frames, adding an 'old school' look to the desktop. Fitted to the **TB TIMBER** bench system using a set of dedicated sliding top hats, **TB PLANK** is available for 1200,1400 & 1600w desktops. **TB PLANK** features pen / pencil slots which double up as handy phone or tablet rests, and can be fitted with multiple accessory options including aircharge surface units, cable ports, and task lights. There are storage jars and pencil tins also available on the following accessory pages.

Pillar Table Base

Product Overview

Designed and manufactured in the UK, Rack's Pillar Base Table Frames are available in 3 heights (coffee, dining & poseur), with or without cable management and with either round, square or squircle base plates. The range includes polished stainless steel cover plates to enhance the overall aesthetic impact of the table bases, and the use of supplementary 'weight plates' will allow the frames to accommodate table tops measuring up to 1200mm in diameter/900 x 900mm square. Supplied in a 'knock down' format these simple self assembly table bases are easy to transport and quick to build. Recent additions to the range include a lap top table and a squircle base option.

- Cable Managed Option
- 3 Heights available - Coffee / Dining / Poseur
- 3 Base Plate Designs - Round / Square / Squircle
- Polished Stainless Steel Base Plate Option (only on Round and Square)
- Weight plate option for greater stability
- New Laptop Table addition

Extent of Range

The Pillar Base Table Range consists of a small 'kit of parts' which can be assembled in a multitude of different ways to create a wide range of cost effective table bases. The standard pillar base upright has an Ø80mm column, and is available in coffee, dining and poseur heights. Each of these uprights can be connected to a choice of 2 sizes of round base (Ø450 or Ø600mm), 2 sizes of squircle base (450 or 600) or a 500mm square base. The cable managed upright has a Ø102mm column, also available in 3 heights, and can be connected to the 3 base choices. Both the standard and cable managed bases can be fitted with a weight plate to cater for larger diameter tops, and all sizes of round & square can be specified with a polished stainless steel top cover on the base plate. A laptop table base is also in the range, available in powder coat finish only, and provides an excellent solution for reception & soft seating areas.

Four Konnect **Tables**

Four Konnect®

With the Four Konnect® table system everyone has a good line of sight and sits at a defined straight edge with 750mm of personal space; no one straddles a table leg, writes over a seam or is squashed into a corner. The four sided frame provides greater rigidity and durability than traditional I frame centrally supported tables.

The dual-locking castor limits movement, negates the need for linking devices and makes Four Konnect® as stable as fixed-frame furniture.

⏱ 4 weeks		🎖 5 year warranty	
⚖ 36 kg KTR25 Weight of other tables on request		♻ 95% recyclable	
⤲ Chrome 3		Ska SKA rated	

Features

The unique shape of Four Konnect® shape creates the perfect configuration for any presentation style
Quickly assembled and reconfigured by a single person
Easy to fold, move and store without heavy lifting or the need of a trolley
As stable as fixed-frame furniture with a rigid and durable 4-sided frame
Locked castor prevents the need for linking devices
50mm levelling ensures table-tops meet flush
Narrow transit profile fits easily through doors (390mm max)
Modesty panels and cable management can be fitted without compromising folding function
Compact nesting to maximise space
25mm MFC tops
MFC, veneer and veneer with banded and inlay tops
Straight and tapered legs
Kite Shape and Four Konnect Rectangular folding tables tested to BS EN 15372:2008 - Test Level 2
Credenzas in matching finish
In table power and data options

ROSH	177.00	Roll-out shelf (Single pack) - black

Focus Storwall

Description

Bespoke product, quotation on request.

Then...
It was a prediction that modern technology would create a paperless society

Now...
It is fact that technology's advance is eclipsed by a mountain of paper.

So...
The big problem is filing and storage… and the space they take.

Relax...
The writings on that wall. The problem is solved by creating more storage in less floor space.

Focus Storwall is the answer. The custom-made floor-to-ceiling wall storage that takes away the paper pressures. When Focus Storwall is working, the clutter disappears. It all means greater efficiency in a more attractive environment.

Mastering the management of space Focus Storwall fulfils the highest demands made on modern offices today. It performs a vital function efficiently and attractively. It has an immediate effect on office performance by lifting pressures of employees, and makes every environment more productive.

Cost Saving
By combining storage and partitioning in one product and also using waste space in its floor-to-ceiling design, Focus Storwall reduces capital outlay.

Flexibility
Focus Storwall is a self-supporting structure designed to grow and adapt with your business; it can be re-sited easily, leaving no permanent evidence of its former position.

Durability
Strong and durable, Focus Storwall is constructed from high-density MFC. The standard width modules can be free-standing or placed against a wall. Integral levelling jacks allow for irregularities and ensure structural stability.

Practical and Durable
Focus Storwall's attractive appearance and clean lines have made storage installation possible in areas previously unusable, such as corridors, boardrooms or reception areas.

Remember, Focus Storwall is planned and built to meet your requirements!

Bisley **Storage**

essentials

Our new Essentials range is exactly that. A group of core products that no office can function without. Cupboards, tambours, lodges, drawers, desk high storage and combination units.

This select portfolio has allowed us to take the complexity out of specifying your perfect work space. A much simpler range not only means a tighter product family but also specific finishes and sizes. With Essentials what you see is what you get. Affordable, high quality storage to suit your needs.

key features

- All units are 470mm deep and have been designed to fit A4 binders, lateral and suspension filing
- All units will come with factory fitted levelling feet as standard (up to 24mm adjustable height)
- Available in 7 of Bisley's most popular colours: Goose grey (av4), Traffic white (ba5), Black (av1), Silver (arn), Anthracite grey (aa3), Light grey (av7) and Chalk white (ab9)
- Tambour shutters available in Silver (.SL), Extra white (.EW), Light grey (.1), Dark grey (.9) and Black (.5)
- Essentials products come with appropriate number of shelves where applicable
- All units will have Lowe and Fletcher AB series locks
- 5-year standard warranty and full after sale customer service
- Bisley branded units as standard

desk high units

key points
- Available in tambours and cupboards enabling 743mm high with a wooden top
- Desk high units are available in two widths – 800mm and 1000mm
- Units come with a pre-fitted shelf allowing two rows of A4 binders
- All desk high units will come with levelling feet allowing 8mm adjustment

drawers

key points
- Drawer units have been designed to complement the other products in the Essentials range
- Available in two widths – 800mm and 1000mm
- Essentials drawer units come in four heights with 24mm adjustable levelling feet
- Units available with 2, 3 and 4 drawers according on height. 1270mm will include a 266.7mm (10.5") top drawer perfect for A4 binders and pockets
- 693mm high drawer units will suit installed base

combination units

key points
- Essentials combination units are the perfect marriage of personal storage and filing space
- Combination units available in three heights to suite with other products in the Essentials family
- Available in two widths – 800mm and 1000mm
- All units come with two filing drawers. 266.7mm (10.5") will include a top drawer

the complete
essentials
by Bisley

cupboards

key points

- Essentials cupboards are aesthetically similar to Bisley A-Series two door cupboards
- Cupboards come in five heights with adjustable levelling feet providing 24mm adjustment

- Available in three widths – 800mm, 914mm and 1000mm
- 1070mm cupboards have been designed to meet standing height standards
- 914mm wide also available without doors

lodges

key points

- Personal storage units have been designed to suit most Essentials products
- Essentials lodges come in four heights matching drawer unit dimensions

- Available in two widths – 800mm and 1000mm
- 4, 6 and 8 door options available
- 693mm, 1000mm and 1300mm will include 304.8mm (12") bottom doors

tambours

key points

- Similar look to CST
- Available in two widths – 800mm (single door) and 1000mm (two doors)
- 800mm wide units available in five heights with adjustable levelling feet

- 1000mm tambours available in six heights including a 2270mm high
- 1070mm cupboards have been designed to meet standing height with an additional wooden top taking them to 1100mm

*Special Offer

Times-2 **Storage**

Times-2 is a high density, double-sided filing system simply operated by the use of a foot pedal. The inner cube has 2 usable sides which rotate on a fixed base. The operator is able to access these from one side. Without doors or shutters, units offer efficient use of floor space by sitting close to walls or screens.

- 50% of your filing is easily accessible at any time
- No doors or handles
- Secure locking system with further enhancements if required
- Flexible planning
- Versatile
- Greater capacity and space saving
- Time saving
- Adaptable

Double Capacity Filing

Times-2 can best be described as 2 filing cupboards placed back to back rotating within an outer, modular cabinet. This allows the operator to access double the amount of filing from the same location. When the operator presses the positive locking foot pedal the unit can be rotated with one hand, (the other hand potentially holding records to be filed).

Filing Add-Ons

When the filing system grows, further Add-on units are fitted, as necessary. Times-2 conforms to the 'form follows function' design principle, this has promoted its success at delivering high density storage and fast retrieval not only for records and documentation but across many different applications from hot desk storage systems to ammunition's and weaponry!

Modular System

The unit has 4 fixed positions (2 open and 2 closed). The foot pedal aids productivity prevents free spin and therefore any potential Health & Safety hazard. As a modular system, each run of Times-2 is built with an initial Starter Unit. Add-on units are then fitted to the Starter to provide the required capacity.

Download the Times-2 brochure from our website www.balmoralcontracts.co.uk

Times-2 is capable of holding a complete range of media. Each unit is configured to the requirement of the user. The following are available in addition to standard reversible shelves and dividers.

Rollout reference shelf

Screens
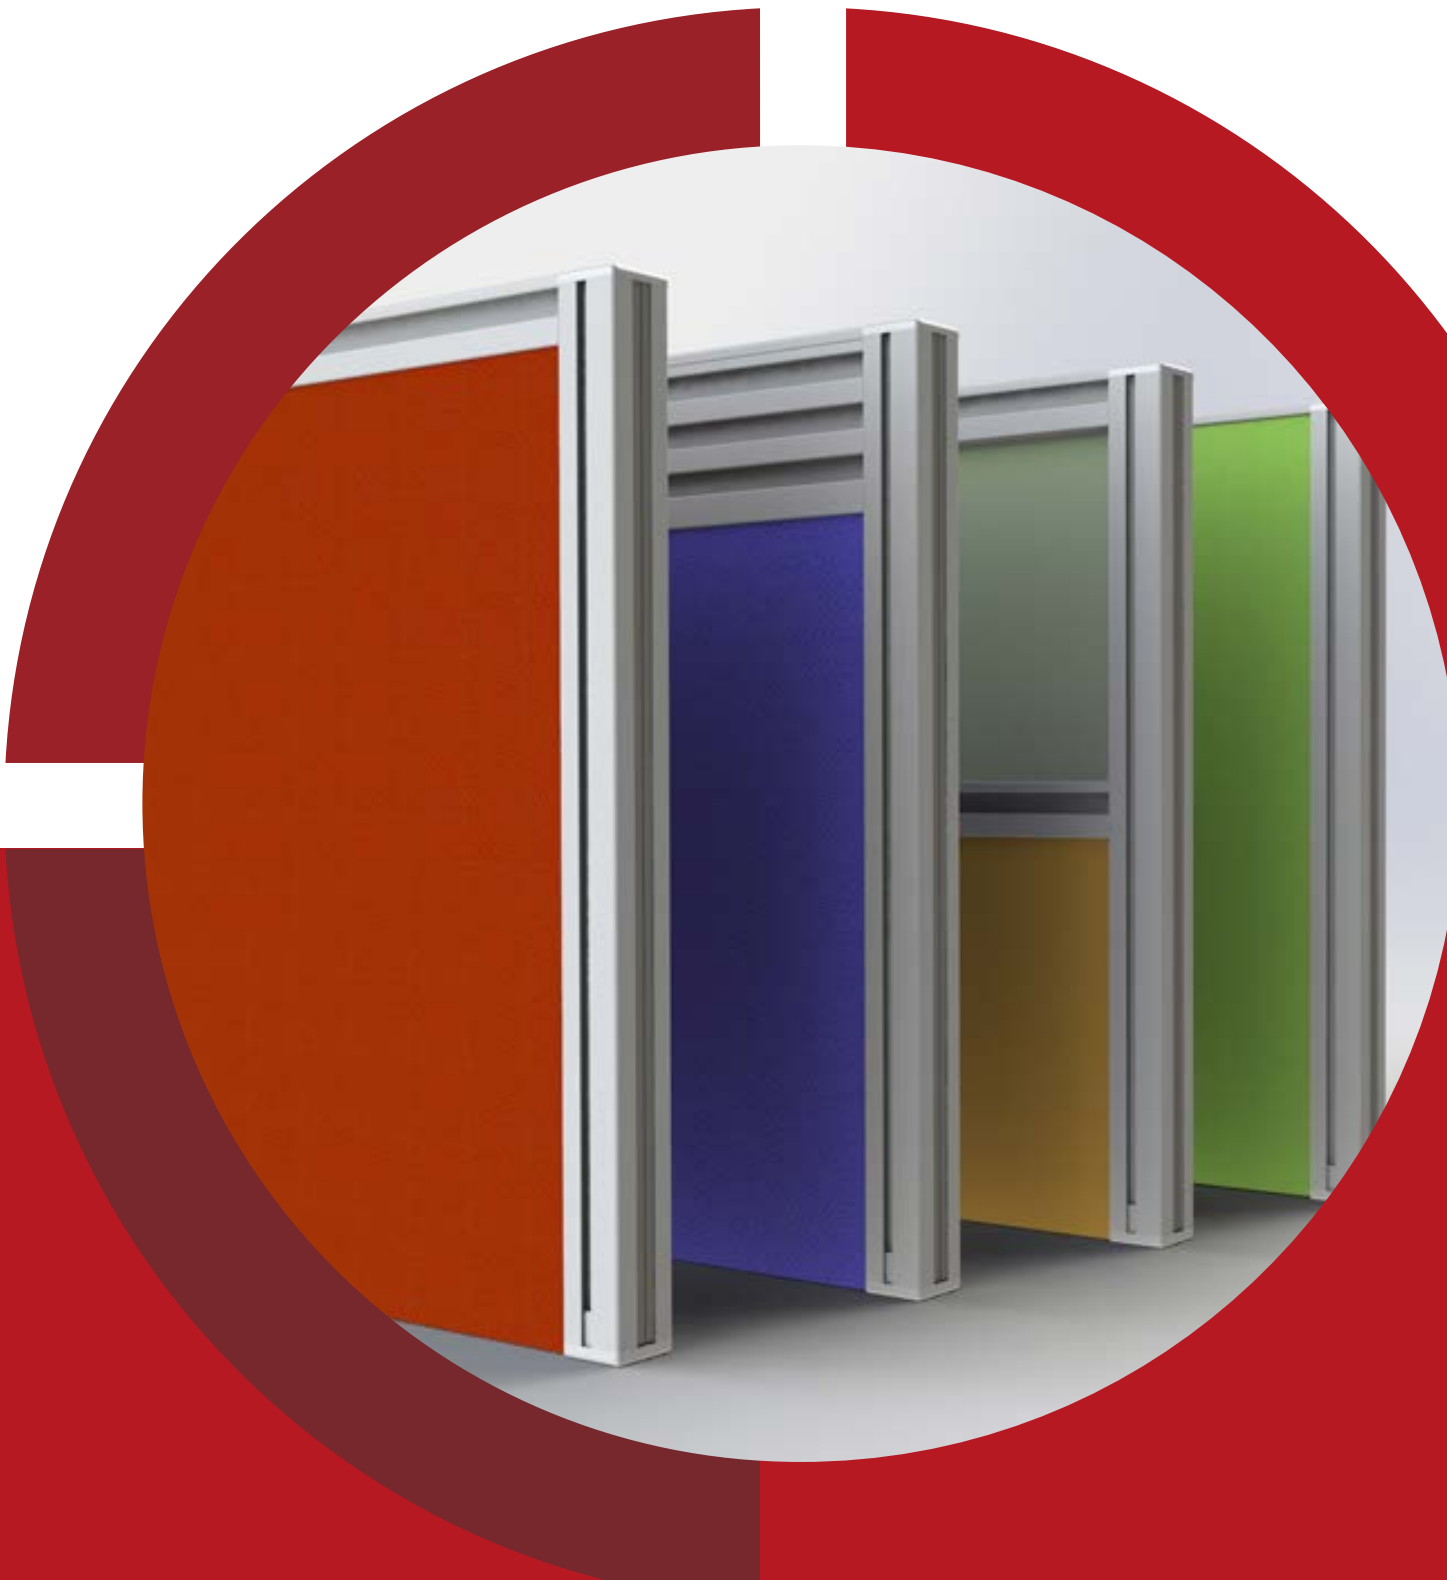

Cosy Screen

COSY is a range of contemporary, fabric covered screens. The elegant edge profile, large radiused corners and bold stitching detail around the hem make this screen a high end product with a premium quality feel.

A combination of keen pricing, superior build quality and considered design ensures that COSY screens represent excellent value for money, whilst remaining appropriate for use within the widest range of office interiors.
COSY screens and brackets have been designed and engineered to integrate with a broad range of desk types, and especially those based on underframes manufactured by Rack Systems.
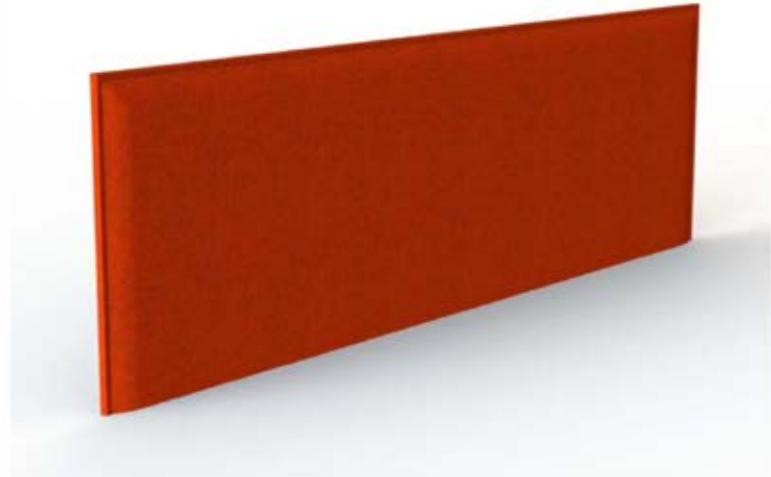

COSY screens comprise of a sewn foam-backed fabric cover upholstered over an 18mm profiled core.

• Fully upholstered 'Soft Touch' screen
• Plush foam backed wool fabrics
• Beautifully detailed exposed stitching
• Contemporary understated design aesthetic
• Works with existing Me2 screen brackets
• Designed and manufactured in Britain
• Premium Quality
• Excellent Value

*Defines the working zone on bench and desk sytems
*Allows privacy; increasing productivity
*Simple and fast repositioning - no bracket needed!
*25mm fabric panel

IMPORTANT NOTE:
*Only fits 25mm Desktops

Trio Screen
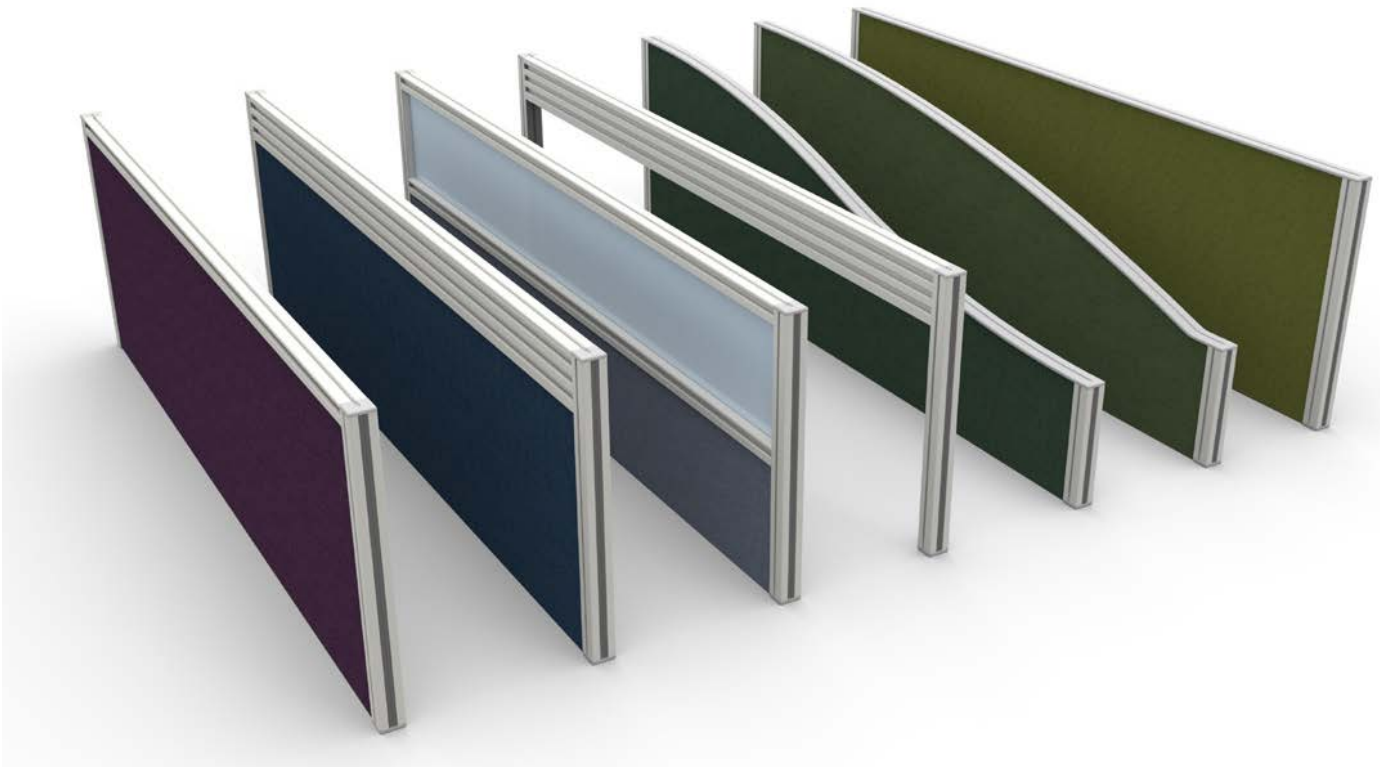

Framed on 3 sides using lightly proportioned bespoke aluminium extrusions, TRIO's clean, crisp, angular design has been conciously conceived to reflect the latest trends in office furniture. The use of intelligently designed aluminium extrusions and cleverly engineered bracketry, ensures that TRIO screens will integrate seamlessly with a wide range of desk types, and especially those based on underframes manufactured by Rack Systems.

The TRIO product family includes plain fabric screens, triple toolbars, half glazed screens, and a management rail option designed to integrate with a wide range of popular screen hung accessories, thus further enhancing the screens functionality. Thoughtful design, clever engineering, beautiful build quality and competitive prices ensure that TRIO screens can be confidently specified for use within the full hierarchy of office interiors.

T1 to T4 screens in the TRIO range are framed with robust aluminium extruded profiles on 3 sides, powder coated to match the desk frames and cleverly designed to include multiple features for mounting, linking and accessorizing. T1 and T3 screens have an integral hanging facility within the top rail, and the addition of the triple toolbar on T2 and T4, enables flat screen monitor arms to be mounted. Screens include a linking strip as standard, which doubles as an end of run trim, and a linking post is available to link up to 4 screens together at 90 degrees. T5, T6 &T7 screens have a PVC top rail.

Screens are finished in fabric, and the glazed screens use 3mm clear perspex as standard, with coloured and frosted options available on request. Screens can also be made pinnable if required, and glazing replaced with perforated sheet steel or dry-wipe powder coated steel panels.

- 30mm screen thickness
- Aluminium frame on 3 sides - T1, T2, T3 and T4
- Integral hanging facility - T1, T2, T3 and T4
- PVC toprail on T5, T6 and T7
- Toolbar and glazing options
- Crisp, clean design
- FIRA tested - The TRIO range of screens has successfully satisfied the relevant sections of BS EN 1023 and BS 476

Halo Screen
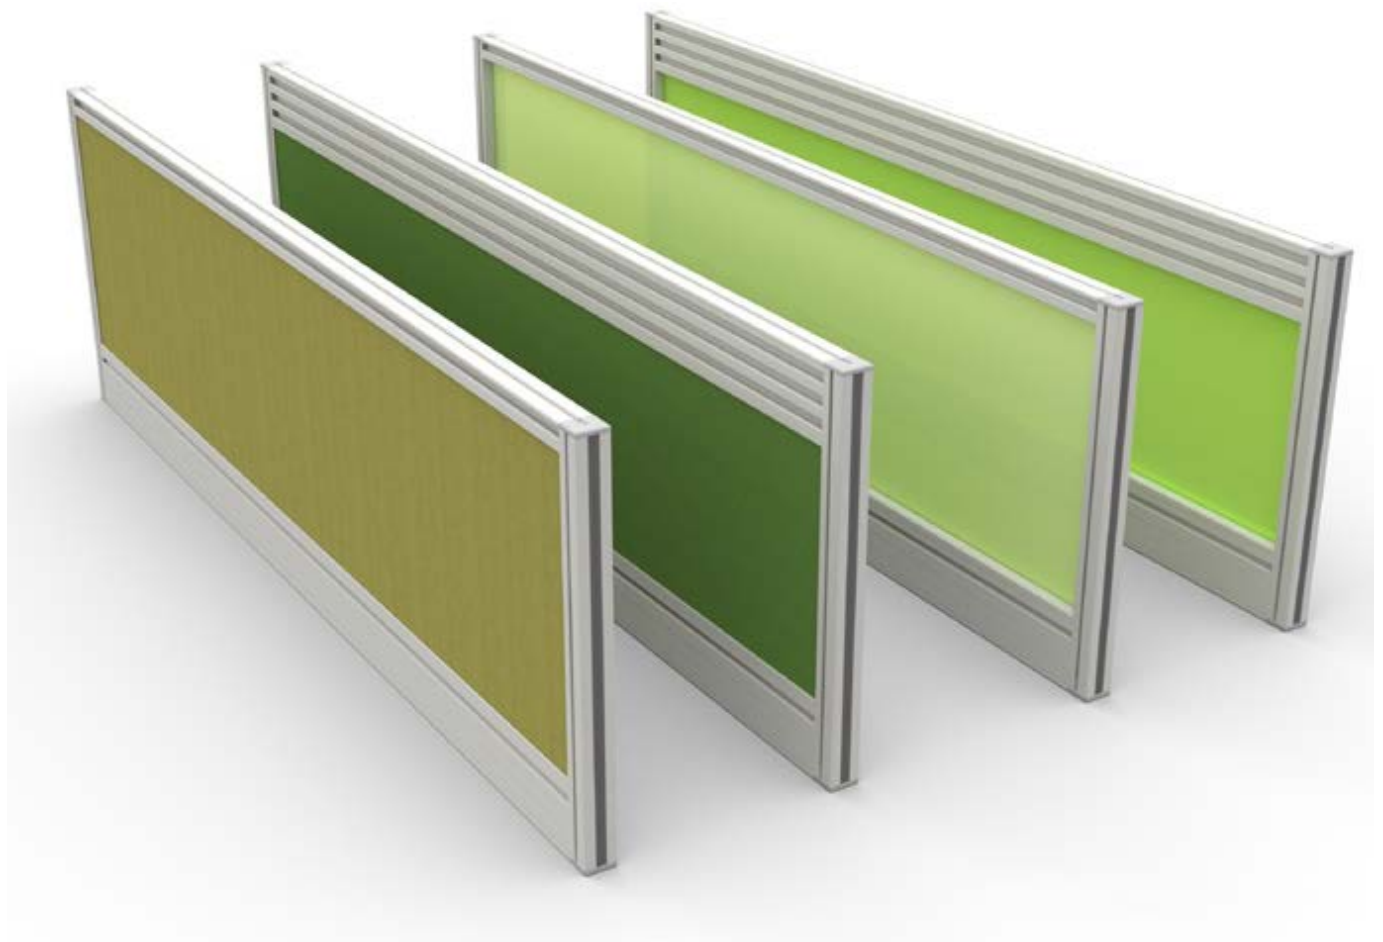

HALO is a comprehensive range of highly functional contemporary desk mounted screens, designed to reflect the latest trends in office furniture. Thoughtful design, clever engineering, beautiful build quality and competitive prices ensure that HALO screens can be confidently specified for use within the full hierarchy of office interiors.

HALO screens are framed on all 4 sides with a series of lightly proportioned, intelligently designed bespoke aluminium extrusions, which allow HALO screens to be supplied with an extensive variety of infill materials. Infill options available include 25mm thick fabric covered panels, 3mm clear or coloured perspex glazing, perforated sheet steel and bespoke laser-cut infill panels, powder coated dry-wipe 'boards', and an upholstered pinnable option. HALO's bottom rail allows sliding tapped inserts to be fixed into at any point along the length of the screen, or alternatively spigot brackets can be inserted into the end trims for greater rigidity. Whichever option is selected, HALO screens will integrate seamlessly with a wide range of desk types, and especially those based on underframes manufactured by Rack Systems.

All screens within the HALO range are framed on 4 sides with robust aluminium extruded profiles. Powder coated to match the desk frames HALO's extrusions are cleverly designed to include multiple features for linking screens and mounting accessories. Every screen has an integral hanging facility within the top rail, and the addition of the toolbar enables flat screen monitor arms to be securely fixed to the screen. Screens include a linking strip as standard, which also doubles as an end of run trim, and a supplimentary post is available to link up to 4 screens together at 90 degrees.

- 30mm screen thickness
- Aluminium frame on all 4 sides
- Toolbar and glazing options
- Creative, elegant design
- Huge range of colours available
- Competitively priced

Mono Screen

Constructed from a well proportioned bespoke aluminium extrusion, MONO's clean, crisp, angular design has been consciously conceived to reflect the latest trends in office furniture. The use of intelligently designed aluminium extrusions and cleverly engineered bracketry, ensures that MONO screens will integrate seamlessly with a wide range of desk types, and especially those based on underframes manufactured by Rack Systems.

The MONO product family consists of MONOflex (trimmed) or MONOstop (trimless) management rails, together with a wide selection of perpsex blades in a choice of distinct colours. All options are designed to integrate with a wide range of popular screen hung accessories, thus further enhancing the rail functionality. Thoughtful design, clever engineering, beautiful build quality and competitive prices ensure that MONO screens can be confidently specified for use within the full hierarchy of office interiors.

All options in the MONO range are constructed from a robust aluminium extruded profile, powder coated to match the desk frames and cleverly designed to include multiple features for mounting, linking and accessorizing. All configurations have an integral hanging facility within the rail which enables flat screen monitor arms to be mounted. MONOflex T1 & 2 options include a linking strip as standard, which doubles as an end of run trim, whereas MONOstop T3 & 4 have a 'trimless' end plate to provide a sleeker look. The choice of a glazed blade on T2 & T4 adds instant colour to MONO, and is ultra easy to fit.

MONO is finished in epoxy powder coat paint, and the glazed blades use 5mm perspex with flame polished edges, and are available in a variety of coloured frosted options.

• 30mm screen thickness
• Aluminium construction
• Integral hanging facility
• Easy fit perspex blade options
• Contemporary range of colours available
• Crisp, clean design

Solo Screen

Constructed from 5mm frosted perspex panels, SOLO's clean, crisp design has been consciously conceived to reflect the latest trends in office furniture. The use of perspex panels and cleverly engineered bracketry, ensures that SOLO screens will integrate seamlessly with a wide range of desk types, and especially those based on underframes manufactured by Rack Systems.

The SOLO product family consists of SOLO-straight, SOLO-wave and SOLO-arc, and all are available in a choice of distinct frosted perspex colours. Thoughtful design, clever engineering, beautiful build quality and competitive prices ensure that SOLO screens can be confidently specified for use within the full hierarchy of office interiors.

SOLO screens use 5mm perspex with beautifully flame polished edges for a high quality finish, and are available in a variety of coloured frosted options.

• 5mm screen thickness
• Perspex construction
• Easy fit bracket options
• Contemporary range of colours available
• Crisp, clean design

SOLO Brackets

SBKT-65 - Desk Bracket

SBKT-66 - Bench Bracket

All prices are EX-WORKS

Size	Product Code	£
SOLO Desk Bracket	**SBKT-65**	£20
SOLO Bench Bracket	**SBKT-66**	£19

Features
- The desk bracket allows fitment of SOLO screens onto most 25mm desktops subject to clearance
- The bench bracket, when used in combination with other components, allows SOLO to be fitted to the spine of bench desking products

Zone Screen

Framed on 3 sides using lightly proportioned bespoke aluminium extrusions, ZONE's clean, crisp, angular design has been consciously conceived to reflect the latest trends in office furniture. The use of intelligently designed aluminium extrusions ensures that ZONE screens will integrate with the TRIO and HALO ranges of deskup screens, which in turn integrate seamlessly with many desk frames, especially those based on underframes manufactured by Me2's parent company Rack Systems.

The ZONE product family includes plain fabric screens with two toprail options, a triple toolbar option, wave and arc top versions, and part or fully glazed configurations. Thoughtful design, clever engineering, beautiful build quality and competitive prices ensure that ZONE screens can be confidently specified for use within the full hierarchy of office interiors.

T1 and T2 screens in the ZONE range are framed with robust aluminium extruded profiles on 3 sides, powder coated to match the desk frames and cleverly designed to include multiple features for linking and accessorizing. T1 screens have an integral hanging facility within the top rail, and the addition of the triple toolbar on T2 enables flat screen monitor arms to be mounted. Screens include a linking strip as standard, which doubles as an end of run trim, and linking posts are available to link screens together at 90 and 120 degrees, as well as a trim mounted stabilising foot if required. T5 & T6 screens have a PVC top rail. ZONE screens are pinnable as standard.

- 30mm screen thickness
- Aluminium frame on 3 sides - T1 and T2
- Integral hanging facility - T1 and T2
- PVC toprail on T5 & T6
- T2 Toolbar option
- T3 Part Glazed version
- T5 Wave top version
- T6 Arc top version
- T8 Fully Glazed version
- Huge range of colours available
- Crisp, clean design

Skoot Screen
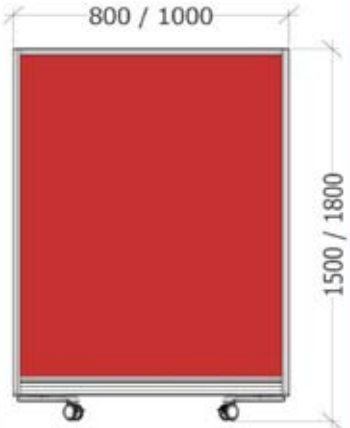

Framed on 4 sides using lightly proportioned bespoke aluminium extrusions, SKOOT's clean, crisp, angular design has been conciously conceived to reflect the latest trends in office furniture. The use of intelligently designed aluminium extrusions ensures that SKOOT screens will integrate with the TRIO and HALO ranges of deskup screens, which in turn integrate seamlessly with many desk frames, especially those based on underframes manufactured by Me2's parent company Rack Systems.

The SKOOT product family includes plain fabric screens with two toprail options, and part or fully glazed configurations which allow the specification of a drywipe panel section if required. Thoughtful design, clever engineering, beautiful build quality and competitive prices ensure that SKOOT screens can be confidently specified for use within the full hierarchy of office interiors. T1 and T2 screens in the SKOOT range are framed with robust aluminium extruded profiles on 4 sides, powder coated to match the desk frames and cleverly designed to include multiple features for accessorising. T1 screens have an integral hanging facility within the top rail, and the addition of the triple toolbar on T2 enables many accessories to be mounted. Screens include a pair of mobile feet, allowing them to be moved around freely, or set up in layouts to provide temporary privacy if required.
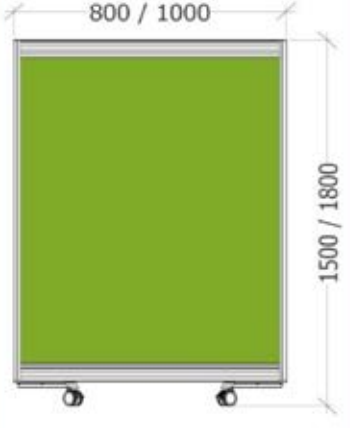

SKOOT screens are pinnable as standard, where upholstered panels are specified.

• 30mm screen thickness
• Aluminium frame on 4 sides
• Integral hanging facility - all types
• T1 Single Toolrail option
• T2 Toolbar option
• T3 Part Glazed version
• T4 Fully Glazed version
• 2 Mobile feet included as standard
• Huge range of colours available
• Crisp, clean design

For use with trio & halo screens, the spigot on this foot slots up the screen end trim and simply rests on the desktop surface

Code: SBKT-53
£15.00

Solo Screen Covid 19 Range
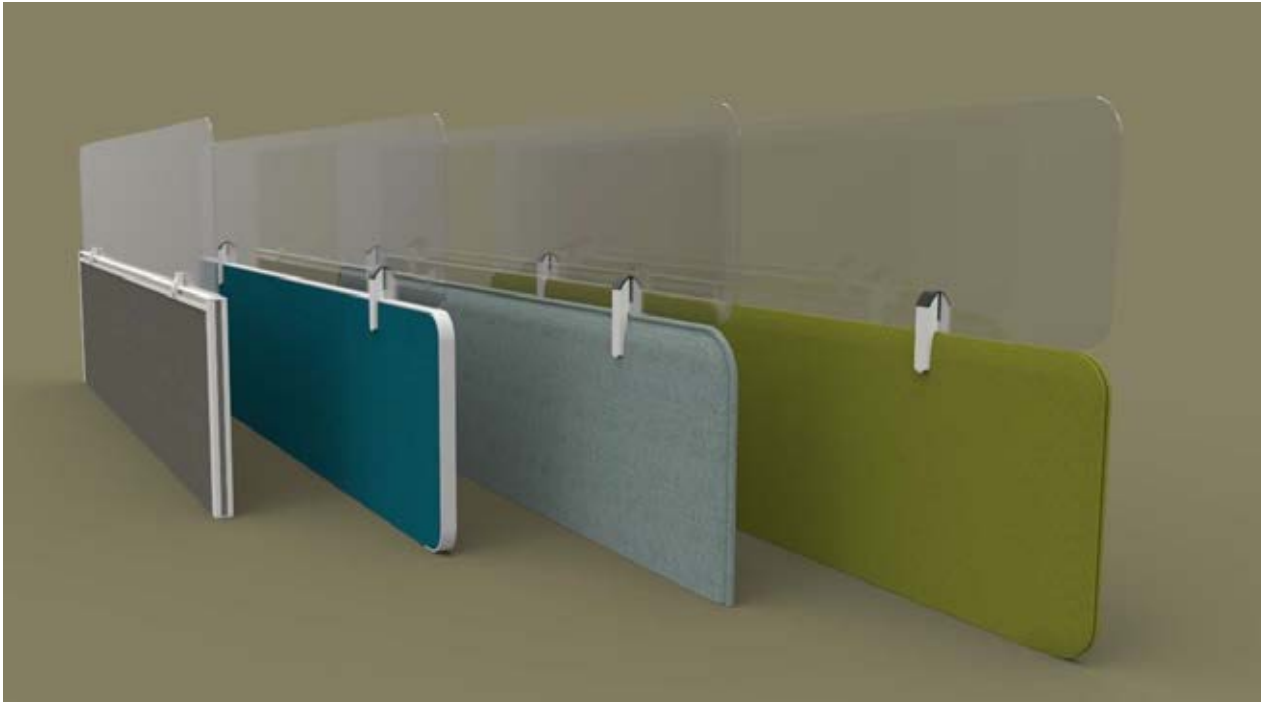

Solo Covid-19 screens have been developed to offer an increased level of protection to office based employees in the wake of the Covid-19 crisis.

Consisting of extra high spine and return screens, plus a range of frameless 'Toppers', the Covid-19 range can be quickly and easily secured to all of Rack's existing screen products (Halo, Trio, Loop, Echo, Cosy & Aero), and subsequently removed without damaging either the screen or desktop to which they have been secured.

Solo Covid-19 screens are manufactured either from 5 & 8mm clear acrylic sheet, 5 & 10mm White Foamed PVC sheet, or 5 & 10mm Clear Twin Wall Polycarbonate.

Sollis Workstation

How to order workstations

When ordering a workstation, first decide upon the occupancy requirements. **sollis** workstations are available as 1 to 8 person configurations. The pricelist is laid out by Model, within that you will find configuration options with a choice of desktop sizes and occupancy. (Please note: Desktops are not included).

We've made the workstation panel sets easy to order by using one simple code;
Firstly choose a Model, then a configuration then add the suffix codes for
- Feet option (either **OA** for Oak or **ST** for Steel *black only*) *this contains the fittings & desktop kits, desktop brackets & link posts where applicable.*
- Fabric band (**Y, C** or **D**). *Don't forget to state Fabric 1 & 2 where applicable.*

The illustration below shows the options you have when choosing feet (Oak or Steel) then fabrics (either Mono-tone or Two-tone) and which side of the panel the fabric is applied.

a

b

a

b

Oak   or   Steel

Key:
a = Panel Fabric 1

K

L

M

Fabric bands

Fabric bands are listed as bands Y, C and D. Band Y represents Rack's standard range of stocked, foam backed Camira Blazer Lite fabrics, allowing the price of this band to be more cost effective.

How to specify fabrics

All **sollis** workstation models are offered in mono-tone as standard with only A, D, E, F, G, H, i, K & L having the option of being specified as two-tone. All models have the option of Oak or Steel feet *(black only)*.

Mono-tone

All panels are upholstered in the same fabric, chosen from a range & band. Panel fabric is specified as 'Fabric 1'
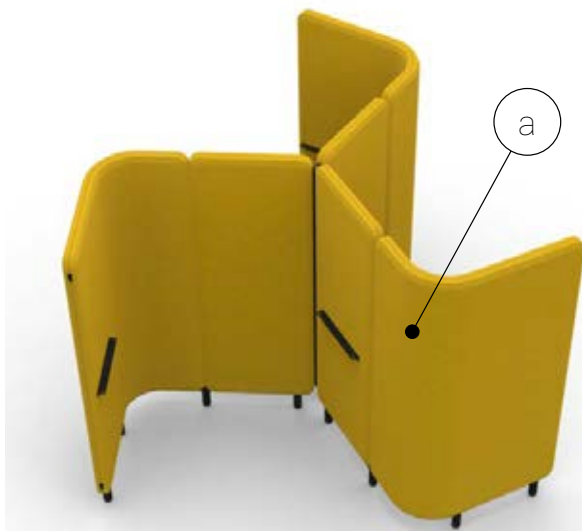

Two-tone

All panels are upholstered in two different fabrics chosen from the same range & band. Panel fabric is specified as 'Fabric 1' and 'Fabric 2'.

Panel Key:
a = Panel Fabric 1

Panel Key:
a = Panel Fabric 1
b = Panel Fabric 2

This information is critical to ensure products are upholstered in the correct combination of fabrics.
Fabrics featured on the workstation must be from the same fabric range & fabric band.
When ordering please ensure fabric choices are clearly detailed as per the example below.

Mono-tone

Panel Fabric 1 = Fabric '?' from Band Y

Two-tone

Panel Fabric 1 = Fabric '?' from Band D
Panel Fabric 2 = Fabric '?' from Band D

All components supplied for the **sollis** range will be delivered as packaged components, not as single assembled entities. Assembly is simple and straight forward, with assembly instructions supplied with each order.

Please note:

Desktops are not supplied.
Metalwork is coated in RAL9017 black only.

Focus **Screens**

Focus Screens has established itself as the standard for entry level office screening. The range offers a stylish but economic solution in a wide spectrum of colours.

Specification

- Constructed from 25mm solid core with heavy duty metal brackets / legs for desk mounted / free standing screens.
- Fire retardant 4mm foam and screen fabric are securely stapled to both panel faces.
- Screen trimmed with silver decorative edging.

inFINITE

System seating has never been so flexible. Our cutting-edge, award-winning beamless inFINITE seating has introduced limitless reconfigurability to passenger terminals and public spaces around the world.

Now this dynamic seating can be infinitely transformed from traditional rows to convivial arc shapes to functional clusters and back into rows again with just one small modification. This allows the unique freedom to create remarkable passenger terminal and public space layouts that can be constantly adapted to accommodate changing requirements.

inFINITE. The possibilities are endless.

We can match our inFINITE upholstery to any RAL or Pantone colours.
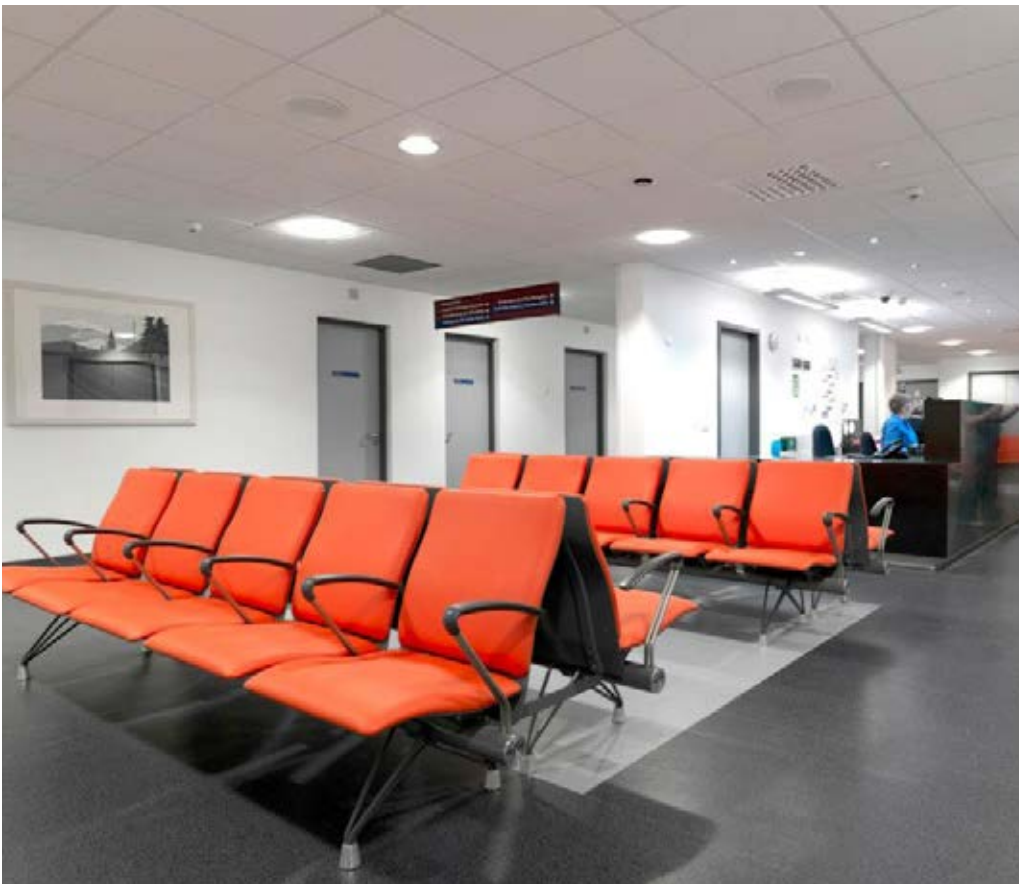

Zona Beam Seat

Proof that strength comes in many forms, Zona is fresh and modern, but its slim profile and uncluttered design cost nothing in terms of durability and robustness. The simplicity which makes it so attractive also means it's easily assembled. A design-led product, it appeals to those who appreciate refined touches as well as to weary passengers grateful for good-looking comfort.
Whether you need continuous rows, back-to-back arrangements, seat-and-table modules of two to seven units, or corner units configured through 90 degrees, Zona's versatility is designed in. You can even arrange them in curves.

Zenky Range

Innovative and design-led, Zenky boasts clean, crisp lines allied to market-leading strength and durability and, as with all Zoeftig product, there's also simplicity, comfort and almost limitless versatility, flexibility and ease of maintenance. The Zenky caters for the body's many and various shapes, and is designed specifically to support them, in comfort, for extended periods. The seats are easy and safe to move and subject to the most rigorous strength-testing; they also have the kind of minimal footprint and slim design which looks great while offering excellent sight-lines and access around and beneath them.

Zenky Plus (High back)

Zineare

Zineare shows that you can have it all. Elegance and sophistication in combination with versatility and robustness: when Zoeftig design and manufacture furniture, it's as hard-wearing as it is good-looking. Its strength is, literally, its strength, which equips it as well for exterior as for interior use. And Zineare's as flexible as it is durable; it comes with table, seat and bench options and is available in a variety of finishes. It's at home wherever people need to wait in comfort, inside or out, which means ferry ports and railway and coach stations, as well as airports.
