POSTURE SEATING

Rigorous study and testing was undertaken at the AHRU in Preston, with the aim of looking at the effects of certain ergonomic posture chairs in this range on peak seating pressure and spinal alignment, against a standard office chair.

The biomechanical data was collected and these Ergo Design® products were found to perform by the scientists at the AHRU. Specifically, spinal alignment is improved through the pelvic tilt, as well as reducing peak seating pressure.

ERGO DYNAMIC Synchro mechanism, seat slide, independent tilt, inflatable lumbar, 5D armrests and height adjustable backrest.

FLEXI

Minimalist design meets maximum flexibility. An integral linking device on the frame helps create safer, structured lay-outs for larger seating areas. The integral stacking peg allows 20 chairs vertically stacked with a gap between chairs to avoid scratching frames or damaging seat upholstery.

Stocked in black with black frames & other colours available to order. Enhance comfort with a seat pad or seat & back pad for longer periods of sitting.
